

SNEHAL NAKHAWA

Jersey City, NJ — +1 201-284-9892 — nakhawasnehal7@gmail.com
[LinkedIn](#) — [GitHub](#) — AWS Certified Developer Associate

SUMMARY

Engineering Lead with 10 years of experience building secure, high-performance distributed systems for global financial and retail clients. Specialized in J2EE, Java, , Spring Boot microservices, and AWS cloud-native architectures. Currently pursuing an MS in Computer Science at Stevens Institute of Technology, integrating Agentic AI and advanced system design to drive scalable, secure, and low-latency technical solutions in Finance, Banking, and Business environments.

EDUCATION

Stevens Institute of Technology <i>Master in Computer Science</i>	Hoboken, NJ Expected in May 2027
K. J. Somaiya Institute of Technology <i>Bachelor of Engineering</i>	Mumbai, India May 2012

PROFESSIONAL EXPERIENCE

Ness Digital Engineering (Pearson VUE) <i>Engineering Lead</i>	Oct 2022 – Sept 2025 Mumbai, India
• Architected Spring Boot RESTful APIs, reducing latency by 30 % through efficient algorithm design, code-level optimizations and asynchronous processing optimizations. • Implemented high-throughput request batching to ensure system stability under extreme load, critical for services using Database batch update, Async Processing with CompletableFuture and Message Queue-Based Batching. • Developed distributed integrations using JAX-RS WebClient with platforms like Salesforce, Kibo ensuring 99.9% data consistency and fault tolerance. • Built a fully functional Angular 17 application from scratch using Angular Material, featuring a dynamic dashboard, Integrated lazy loading and route-level code splitting, reducing initial bundle size by 35% and significantly improving application load performance with seamless CRUD operations across multiple modules. • Containerized services using Docker and Kubernetes deployment on Azure to support massive concurrent user traffic. • Enhanced database performance by 50% through sophisticated query tuning, stored procedure optimization, and indexing and cache strategies in hibernate JPA.	
Larsen & Toubro Infotech (NEXI Group) <i>Software Engineer</i>	June 2019 – September 2022 Mumbai, India
• Scaled API Marketplace for BSF services, using the WSO2 API Gateway for secure discovery and consumption. • Automated customer onboarding via RESTful services for API key/secret generation and token-based access control. • Designed event-driven integrations using RabbitMQ to enhance reliability and enable asynchronous communication. • Led cross-functional teams across engineering and compliance to deliver complex projects within strict timelines. • Architected a self-service API Gateway Access Token Management portal in Angular 12, allowing developers to generate, rotate, and revoke OAuth 2.0 client credentials — reducing manual provisioning overhead by 70% and onboarding time from days to minutes.	
Mastek Limited (Morrison) (Hitachi Capital UK) <i>Software Developer</i>	April 2016 – May 2019 Mumbai, India
• Engineered real-time digital pricing platform supporting 5K+ concurrent users with low-latency interactions. • Reduced API response latency by 25-30% using Spring Boot microservices and event-driven architecture. • Implemented cloud-native architectures on AWS(S3, Lambda, SNS, API Gateway) for scalable processing. • Reduced release time by 40% by orchestrating CI/CD pipelines with Jenkins and GitHub Actions. • Architected and delivered an end-to-end Barcode Scanning and Price Tag Generation platform using Angular 11, Angular Material, and RxJS, adopted across retail locations and processing daily scan events with sub-200ms response latency.	
Trimix Private Limited (Siddhivinayak) (MSRTC) <i>Java Developer</i>	Jan 2015 – April 2016 Mumbai, India
• Developed "Siddhivinayak," a high-traffic temple management web portal using Spring Framework for devotees. • Engineered a robust payment processing module by integrating BillDesk and multiple third-party vendors, facilitating high-volume daily transactions with a 99.9% success rate and ensuring secure financial data consistency. • Managed end-to-end deployment and server configuration using Apache Tomcat to ensure high availability.	

TECHNICAL SKILLS

- **Languages/Frameworks:** Core Java, Multi threading & Concurrency, J2EE, JMS, JTA, Collections Frameworks, Java 8+ features, System Design, Data Structure and Algorithms, Exception Handling, Object oriented Programming.
- **Spring Framework** and Spring Boot, Spring MVC, Spring Data, Spring JMS, Spring JDBC, Spring Security.
- **Microservices development** experience using Spring boot, AppDynamics, Docker, Kubernetes, Kafka, RabbitMQ, Redis, Swagger, SOAP web services, RESTful API, Web-Client, JAX-RS, GraphQL, Web-flux, JWT, Oauth-2, Hibernate JPA, SQL and NoSQL databases -DynamoDB, Junit, Mockito.
- **Fronted application** Angular, TypeScript, JQuery, RxJS, Angular Material, Web-pack, NPM.
- **Python**, streamlit, LangChain-Agent, MCP, ML- RandomForest Model
- **Cloud & Infrastructure:** AWS (EC2, Lambda, ECS, S3), API Gateway , DevOps process and tools like Jenkins, Docker, Kubernetes, Terraform, CI/CD along with build technologies Maven/Gradle, Splunk.
- **AI & Productivity:** Copilot, Agentic-AI, RAG, Chatbot, LLM Integration (LangChain, Ollama), Agile/Scrum, SDLC.

ACADEMIC PROJECTS (STEVENS INSTITUTE)

Industrial IoT Predictive Maintenance

- Built fault-detection platform using Random Forest, reducing downtime by 80% through real-time sensor analysis.
- Integrated LLM-powered agents (Ollama + LangChain) for automated conversational diagnostics.

Reinforcement Learning Lunar Lander (DQN)

- Implemented Deep Q-Network agent using TensorFlow and PyGame to achieve maximum reward stability.

CERTIFICATIONS

- **AWS** [AWS Certified Developer – Associate](#)

Issued 2024
